THIRD-PARTY INTEGRATION WITH MSD365 BUSINESS CENTRAL

The integration of third-party applications with Dynamics 365 is primarily through the APIs that are provided by Microsoft. These are called Dynamics 365 REST APIs and include REST-based, SOAP-based, and web-based APIs.

Microsoft Dynamics 365 Business Central

REST API

Representational State Transfer

WEB API

WEB-Based API

SOAP

Simple Object Access Protocol

Microsoft Partner

Microsoft Dynamics 365 Business Central

WHAT IS AN API IN SIMPLE TERMS?

An API is essentially a messenger that takes requests, translates, and returns responses. When you sit down to order at a restaurant, the waiter takes your order, relays it to the kitchen, and returns with your food. In this scenario, the waiter acts as the API, or intermediary.
